

10. Integrated Services Digital Network (ISDN) Services**10.6 ISDN Primary Service**

10.6.6 Responsibility of the Customer	
C.	A customer provided channel service unit or equivalent functionality is required at each termination of an ISDN primary service local distribution channel on the customer's premises. The channel service unit must be compatible with the extended superframe framing format and the B8ZS line code.
D.	Customer provided switching systems must be arranged to provide for the interception of assigned but unused station numbers, including vacant station number groups as required.

10.6.7 Regulations	
A.	Minimum Service Period for the ISDN primary port and local distribution channel is one year. The minimum service period for ISDN primary DID numbers is one month.
B.	Provisions for Other Services — A customer calling an ISDN primary telephone number can control the disclosure of his directory number by utilizing the blocking option specified for Phonesmart (refer to Part A, Section 7).

10.6.8 Application of Rates and Charges	
A.	All local messages are provided at local usage charges for measured business service.
B.	PBX trunk, DID trunk charges and other dial tone access line rates and charges, as contained in other sections of this tariff, are not applicable to ISDN primary.
C.	Usage
1.	Voice usage generated by using ISDN Primary will be charged in accordance with the usage rates for the associated service(s).
2.	For Circuit Switched Data usage for ISDN Primary Service installed prior to October 26, 2002, the customer may either select a circuit switched data usage pricing option set forth in (3) following or continue to be charged in accordance with the usage rates for Switchway. For ISDN Primary Service installed on or after October 26, 2002 the customer must select from one of the two circuit switched data usage pricing options set forth in (3) following.
3.	Pricing Options –The customer may select from two pricing options for circuit switched data usage. Option 1 circuit switched data usage is provided on a per minute basis with no usage allowance. Option 2 circuit switched data usage is provided with a monthly usage allowance for a flat monthly rate. Any additional minutes of use above the monthly allowance are offered at a discounted rate. Toll charges will apply when circuit switched data calls are made outside of the customer's local exchange area.
D.	Initial and additional local distribution channels are provided at the monthly rates for Superpath local distribution channels. The NRC for the initial local distribution channel is the same as the S&E charge specified for Superpath local distribution channels.

10. Integrated Services Digital Network (ISDN) Services
10.6 ISDN Primary Service

10.6.8 Application of Rates and Charges		
E.	DID numbers are available at the rates and charges specified in Part A Section 12.	(X)
F.	Where a customer chooses to have ISDN primary provided on a foreign exchange or foreign central office basis, the rate for a Superpath 1.544 Mbps digital service interoffice channel applies.	
G.	An ISDN primary customer served from a foreign exchange or foreign central office may request to have service provided from the customer's normal central office when facilities become available in the normal central office without application of S&E charges. A new minimum service period becomes effective when service is established at the normal central office.
